REVISION OF DRAWING

In response to the Examiner's Notice of Allowability, dated 1 September 1992, requiring the submission of formal drawing, Applicants request that the accompanying four (4) drawing sheets be entered in the above-identified application.

REMARKS

The enclosed sheets have been revised in response to the Draftsman's objections to the original drawing as set out in PTO Form 948, dated 15 May 1992. In particular, the four (4) Figures

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner of Patents and Trademarks, Washington, D. C. 20231.

have been recrawn and reprinted in a manner which ensures clear, dark, and sharp lines and reference characters. In addition, the views and legends have been arranged according to the currently pending proposed revisions to 37 C.F.R. 1.84, namely, the Figure legends, "FIG. 1" etc., are positioned to read in the same horizontal page attitude as the main body of the drawing graph, and the title of the Y-axis of each graph has been rotated so that it now appears according to the standard scientific convention exception. Sheet numbers have also been added at the right side (vertical top) of each sheet. These revisions were verbally approved by the Draftsman's office during a telephone interview with Applicants' attorney on 21 October 1992.

Respectfully Submitted
